

SESTO HealthGuard in an office canteen

Automated disinfection of bus depot office canteen

Challenges

- Office canteen is an area utilised by transport company's employees round the clock. Challenge of employing cleaning crew to disinfect the shared facility after office hours
- Covid 19 pandemic demands higher frequency of disinfection of shared canteen that manual labour is not able to sustain

Solution

- One unit of SESTO HealthGuard with automated disinfection sprayer that targets the open space of the canteen and high touch surface areas such as counter tops
- Disinfection liquid based on aqueous ozone is odourless and safe to be dispensed in the presence of company's employees
- Simple to use touchscreen on HealthGuard to launch ad-hoc or scheduled disinfection routines

Client's Outcome

- Improve well-being and workplace safety of employees with stepped up frequencies of disinfection not possible with manual processes
- No cases of COVID 19 transmission
